When you have successfully downloaded your Vaccination Certificate Version 1.0, the Vaccination Certificate will be enhanced to ensure that it remains up-to-date with local and international standards. You will therefore have to download your updated vaccination certificate to ensure that it is up-to-date. The Department of Health will advise availability of newer versions of Covid-19 vaccination certificates as they become available.

This certificate is not intended to be readable by the general public, it is meant to be used by entities to verify the card's validity, using a Vaccine Certificate System inbuilt QR scanner which will be available in the future.

IMPORTANT – Please report fraud or misuse to evdsfraud@health.gov.za

The health department's vaccination certificate will serve as proof you've been vaccinated and will allow you to gain access to prescribed areas and attend events with mandatory vaccination requirements – such as sports events.

The Openitem application is the first to support the scan and clearance of vaccinated visitors or attendees. Our technology enables to check validity of immunity passports and grant access based on the visitor's vaccinated status. All you need is your COVID-19 Vaccination Certificate that can be obtained by clicking the following link and entering the information required.
