CONTACTLESS ACCESS CONTROL WITH AUTO OPEN & CLOSE TRIGGER

Imagine the possibility of an estate's boom gate opening automatically as you approach. Now its possible with our new auto trigger enablement.

Our Contactless/Touchless Bluetooth Remote-Control function is available to assist residents and estate management with easy, quick, reliable and convenient access and exit to controlled access points. No need to roll down your window!

This functions in a complete off-line environment. Thus, the user's and the gate-controlled device needn't be online. Bluetooth proximity settings have been built-in the app, to ensure that residents can only use this remote-control function, if they are in proximity of the gate and in the correct lane.
