

THE SYSTEM ENSURES EFFORTLESS ENTRY WITHOUT THE NEED TO HANDLE A PHONE OR ENGAGE WITH SECURITY PERSONNEL. AS A VEHICLE APPROACHES, THE SYSTEM AUTOMATICALLY DETECTS THE REGISTERED MOBILE DEVICE VIA BLUETOOTH AND VERIFIES THE ACCESS CREDENTIALS. ADDITIONAL INSTRUCTIONS, CRUCIALLY, **NOTIFICATIONS ARE READ ALOUD THROUGH THE VEHICLE'S INFOTAINMENT SYSTEM.**

CarPlay & Android Auto

secure, seamless, and fully hands-free experience

Openitem's vehicle access control solution for home and residential estates delivers a secure, seamless, and fully hands-free experience for residents, guests, and service providers. Designed for integration with mobile devices and compatible with Apple CarPlay, Android Auto, and access verification via Bluetooth, Openitem ensures effortless entry without the need to handle a phone or engage with security personnel. As a vehicle approaches the estate, the system detects the registered mobile device via Bluetooth and automatically verifies access credentials.
