

SMARTER ONBOARDING. STRONGER COMPLIANCE. SEAMLESS ACCESS.

By digitising profile onboarding and document collection upfront, OpenItem reduces manual administration, improves data accuracy, enhances on-site security, and creates a faster, more professional access experience for both users and administrators.

Complete your Profile

OpenItem Profile Wizard

The OpenItem Profile Wizard transforms onboarding into a seamless digital experience, guiding users through profile creation with an intuitive, secure, and compliant setup process. Designed to simplify onboarding while enhancing security, it ensures every profile is complete, verified, and access-ready from registration.

Users can submit ID numbers or scan barcodes for identity verification, upload primary and alternate profile photos, accept estate- or site-specific indemnity and access documents, complete required resident, visitor, contractor, or staff information, and securely save verified details for future access and streamlined approvals.
